

EVOLUTION IS INEVITABLE. CHANGE IS A CHOICE... CHOOSE EVOLUTION.

THE TIME IS NOW FOR ONE-STOP INTEROPERABLE SOLUTIONS THAT
MEET THE DEMANDS OF THE EMERGING IPTV MARKET. ..

Just by choosing to receive your IPTV satellite signal from an **authorized IPTV transport provider**, you already realize the value that a consolidated source of programming brings to your offering. All that remains is finding the right option for your content licensing needs. That is where the **NTTC**, the National Telco Television Consortium, can help.

The **NTTC** team has extensive knowledge from a variety of perspectives including operational, contractual and technical. This **diverse expertise** allows the **NTTC** to offer operators a truly unique set of services that will differentiate and solidify their position as **an IPTV leader**.

Most importantly, **we listen**. That's what sets us apart. Our consultative and educational approach allows us to hear what you need and then to find the best solutions to deliver it. **No preaching... just advice**. At **NTTC** we understand that each member is different and that it is important to embrace those differences instead of forcing you to look like everyone else.

The end result... not only a channel lineup that you **believe in** and that your customers will want to purchase, but an offering that is **approved** and **endorsed** by **national programming providers**.
